Chiropractic

TERMS OF ACCEPTANCE

When a patient seeks chiropractic health care, and when a chiropractor accepts a patient for such care, it is essential that both are seeking and working for the same goals.

**TO LOCATE, ANALYZE AND CORRECT
SPINAL INTERFERENCE TO THE NERVOUS SYSTEM AND MECHANICAL
MALFUNCTION INVOLVING THE MUSCULOSKELETAL SYSTEM THROUGH THE
ADJUSTMENT OF SUBLUXATIONS (SPINAL MISALIGNMENTS).**

"The practice of Chiropractic focuses on the relationship between structure (primarily the spine) and function (as coordinated by the nervous system) and how that relationship affects a person's health.

In addition, Doctors of Chiropractic recognize the value and responsibility of working in cooperation with other health care providers when in the best interest of the patient.
